If you have any questions on the exam question and answers, we will help you solve it, Our 1z0-1063-21 real questions simulate the real exam environment, which is a great help to you.

In the end choosing the 1z0-1063-21 reliable real exam dumps with high pass rate is very important for you to pass your IT exam, Oracle Customer Data Management Cloud Service provides certifications designed to grow your skills so you can exploit the opportunities made possible by Oracle Customer Data Management Cloud Service **1z0-1063-21 Reliable Dumps** technology, you can demonstrate your expertise and validate your skills by getting relevant Oracle Customer Data Management Cloud Service certifications.

Pass Guaranteed Professional Oracle - 1z0-1063-21 Reliable Dumps

you will benefit a lot from it, If you are in a network outage, our Oracle Customer Data Management Cloud Service 1z0-1063-21 exam study guide will offer you a comfortable study environment, We have all kinds of experiences on the 1z0-1063-21 study braindumps for many years, so we know that the content of the exam is related to real-time information.

We provide 1z0-1063-21 dumps to prepare for Oracle Customer Data Management Cloud Service exam in one go, instead of getting stuck for years, We have one year service warranty for everyuser, It is impossible for everyone to concentrate [Exam A1000-144 Actual Tests](#) on one thing for a long time, because as time goes by, people's attention will gradually decrease.

Qrt 100% passing guarantee comes with **1z0-1063-21 Reliable Dumps** 100% money back policy, If you have chosen our products, you can begin your journey now!

#### **NEW QUESTION: 1**

You are creating a class library that will be used in a web application.

You need to ensure that the class library assembly is strongly named.

What should you do?

- A. use the EdmGen.exe command-line tool.
- B. use the AL.exe command-line tool.
- C. use the csc.exe /target:Library option when building the application.
- D. use the aspnet\_regiis.exe command-line tool.

**Answer: B**

Explanation:

The Windows Software Development Kit (SDK) provides several ways to sign an assembly with a strong name:

\*Using the Assembly Linker (Al.exe) provided by the Windows SDK.

\*Using assembly attributes to insert the strong name information in your code. You can use either the AssemblyKeyFileAttribute or the AssemblyKeyNameAttribute, depending on where the key file to be used is located.

\*Using compiler options such /keyfile or /delaysign in C# and Visual Basic, or the /KEYFILE or /DELAYSIGN linker option in C++. (For information on delay signing, see Delay Signing an Assembly.)

Note:

\*A strong name consists of the assembly's identity-its simple text name, version number, and culture information (if provided)-plus a public key and a digital signature. It is generated from an assembly file (the file that contains the assembly manifest, which in turn contains the names and hashes of all the files that make up the assembly), using the corresponding private key. [\[email#160;protected\]](#) Visual [\[email#160;protected\]](#) .NET and other development tools provided in the .NET Framework SDK can assign strong names to an assembly. Assemblies with the same strong name are expected to be identical.

**NEW QUESTION: 2**

which of the following dates are delivery scheduling dates in ERP?

There are 5 correct answers to this question.

Response:

- A. Customer requested delivery date
- B. Transportation planning date
- C. Goods issue date
