NEW QUESTION: 1

This question consists of two statements: One is named Assertion and the other is named Reason. Both of these statements may be true; both may be false; or one may be true, while the other may be false.

To answer this question, you must first evaluate whether each statement is true on its own. If both statements are true, then you must evaluate whether the Reason (the second statement) correctly explains the Assertion (the first statement). You

will then select the answer from the list of answer choices that matches your evaluation of the two statements.

Assertion:

You must install and configure Network Device Enrollment Services (NDES) on CHICA01.

Reason:

NDES allows non-domain joined devices to obtain a Certificate Revocation List from an Active Directory-integrated certification authority, and then validate whether a certificate is valid.

Evaluate the Assertion and Reason statements and choose the correct answer option.

- A.** The Assertion is true, but the
- B.** The Assertion is false, but the
- C.** Both the Assertion and Reason are true, and the Reason is the correct explanation for the Assertion.
- D.** Both the Assertion and Reason is not the correct explanation for the Assertion.
- E.** Both the Assertion and the

Answer: B

Explanation:

Explanation

The Network Device Enrollment Service (NDES) allows software on routers and other network devices running without domain credentials to obtain certificates based on the Simple Certificate Enrollment Protocol (SCEP).

You are working with a customer who is using Chef Configuration management in their data center. Which service is designed to let the customer leverage existing Chef recipes in AWS?

- A.** AmazonSimple Workflow Service
- B.** AWSCloudFormation
- C.** AWSElastic Beanstalk
- D.** AWSOpsWorks

Answer: D

Explanation:

Explanation

AWS OpsWorks is a configuration management service that helps you configure and operate applications of all shapes and sizes using Chef. You can define the application's architecture and the specification of each component including package installation, software configuration and resources such as storage. Start from templates for common technologies like application servers and databases or build your own to perform any task that can be scripted. AWS OpsWorks includes automation to scale your application based on time or load and dynamic configuration to orchestrate changes as your environment scales.
