NEW QUESTION: 1

John is the MultiCorp Security Administrator. If he suggests a change in the firewall configuration, he must submit his proposal to David, a security manager. One day David is out of the office and John submits his proposal to Peter. Surprisingly, Peter is not able to approve the proposal because the system does not permit him to do so?

Both David and Peter have accounts as administrators in the Security Management server and both have the Read/Write ALL permission. What is the reason for this difference?

- A. There were some Hardware/Software issues at Security Management server on the first day.
- B. Peter was no logged on to system for a longer time
- C. The attribute Manage Administrator was not assigned to Peter
- D. The specific SmartWorkflow read/Write permission were assigned to David only.

Answer: C
