**Answer: D**

Explanation:  
When the user has enabled the monitoring of estimated charges for the AWS account with AWS CloudWatch, the estimated charges are calculated and sent several times daily to CloudWatch in the form of metric data. This data will be stored for 14 days. The billing metric data is stored in the US East (Northern Virginia) region and represents worldwide charges. Hence, the metric data will not show data specific to that region.  
This data also includes the estimated charges for every service in AWS used by the user, as well as the estimated overall AWS charges.
