NEW QUESTION: 1

The main corporate website has a service level agreement that requires availability 100% of the time, even in the case of a disaster. Which of the following would be required to meet this demand?

- A. Cold site implementation for the datacenter
- B. Warm site implementation for the datacenter
- C. Geographically disparate site redundant datacenter
- D. Localized clustering of the datacenter

Answer: C

Explanation:

Data backups, redundant systems, and disaster recovery plans all support availability. AN in this case a geographically disparate site redundant datacenter represents 100% availability regardless of whether a disaster event occurs.

NEW QUESTION: 2

- A. Option B
- B. Option A
- C. Option D
- D. Option C

Answer: D

NEW QUESTION: 3

You administer all the deployments of Microsoft SQL Server 2012 in your company. You need to ensure that an OLTP database that uses a storage area network (SAN) remains available if any of the servers fail. You also need to minimize the amount of storage used by the database. Which configuration should you use?

- A. * Two servers configured in the same data center * SQL Server Availability Group configured in Asynchronous-Commit Availability Mode * One server configured as an Active Secondary
- B. * Two servers configured in different data centers * SQL Server Availability Group configured in Synchronous-Commit Availability Mode * One server configured as an Active Secondary
- C. * Two servers configured in the same data center * A primary server configured to perform log-shipping every 10 minutes * A backup server configured as a warm standby
- D. * Two servers configured in different data centers * SQL Server Availability Group configured in Asynchronous-Commit Availability Mode
- E. * SQL Server that includes an application database configured to perform snapshot replication
- F. * SQL Server that includes an application database configured to perform transactional replication
- G. * Two servers configured on the same subnet * SQL Server Availability Group configured in Synchronous-Commit Availability Mode
- H. * Two servers configured in a Windows Failover Cluster in the same data center * SQL Server configured as a clustered instance

Answer: H
