NEW QUESTION: 2

An entity prepares financial statements to 30 June.
During the year ended 30 June 20X2 the following events occurred:

1 July 20X1

* The entity borrowed \$100 million at a variable rate of interest.

* In order to protect itself against the variability of its interest cashflows, the entity entered into a pay-fixed-receive-variable interest swap with annual settlements. The fair value of the swap on this date was zero.

30 June 20X2

* The entity received a net settlement of \$2 million under the swap. After this net settlement, the fair value of the swap was \$5 million - a financial asset.

The entity decides to use hedge accounting for this arrangement and has designated it as a cash flow hedge. The swap is a perfect hedge of the variability of the cash interest payments. Which of the following describes the treatment of the settlement and the change in the fair value of the swap in the statement of profit or loss and other comprehensive income for the year ended 30 June 20X2?

- A. \$7 million is recognised in other comprehensive income.
- B. \$2 million is recognised in profit or loss and \$5 million is recognised in other comprehensive income.
- C. \$5 million is recognised in profit or loss and \$2 million is recognised in other comprehensive income.
- D. \$7 million is recognised in profit or loss.

In the first phase of IKE V1, the pre-shared key master mode exchange process, in which message is the SA payload sent?

- A. Message 7 and Message 8

Note: IKE V1 Phase 1 mainly negotiates the following three tasks: First, negotiate the parameters used to establish IKE SA: encryption algorithm, integrity verification algorithm, identity authentication method and authentication word, DH

group, IKE SA life cycle, etc. . These parameters are defined in the IKE security proposal. The second is to use the DH algorithm to exchange information related to the key (the material for generating various keys), and the peer devices can use each of the key information to generate a symmetric key for ISAKMP message encryption and verification. The third is to verify each other's identity and use a pre-shared key or digital certificate to verify identity.

B. Message 5 and Message 6

C. Message 3 and Message 4

D. Message 1 and Message 2

Answer: D
