NEW QUESTION: 1

Two rival furniture manufacturers have recently merged together. Before the merge each party had three outlets and one factory each. Now they have two factories, six stores with another 3 planned in the next year.

Previously, one company had operated with function cost centres, looking at costs incurred by each department whilst the other had chosen to look at costs per activity.

Whilst the companies were small this worked and costs were easy to manage and issues could be dealt with quickly and efficiently. Since then costs have gone out of control as the old systems no longer work for this large, nationwide company. What is a suitable type of cost centre to use now?

- A. Equipment
- B. Activity
- C. Service location

Answer: C

NEW QUESTION: 2

DRAG DROP

Answer:

Explanation:

* Azure Rights Management service

Azure Rights Management service uses encryption, identity, and authorization policies to help secure your files and email, and it works across multiple devices-phones, tablets, and PCs.

Information can be protected both within your organization and outside your organization because that protection remains with the data, even when it leaves your organization's boundaries.

* Transparent Data Encryption

Transparent Data Encryption (often abbreviated to TDE) is a technology employed by both Microsoft and Oracle to encrypt database files. TDE offers encryption at file level. TDE solves the problem of protecting data at rest, encrypting databases both on the hard drive and consequently on backup media.

* TLS/SSL

Transport Layer Security (TLS) and its predecessor, Secure Sockets Layer (SSL), are cryptographic protocols designed to provide communications security over a computer network. They use X.509 certificates and hence asymmetric cryptography to authenticate the counterparty with whom they are communicating, and to negotiate a symmetric key.

NEW QUESTION: 3

Regardless of their practice area, nurses should be concerned with:

- A. transmission of microorganisms.
- B. overprescription of bacteriostatic drugs.
- C. all drug-resistant bacteria.
- D. microorganisms that are critical.

Answer: A

Explanation:

All nurses should be concerned with preventing the transmission of microorganisms to themselves as well as to others. One way to accomplish this goal is by asepsis. Nursing practice focuses on providing a safe and therapeutic environment to protect clients, family members, and health care providers from acquiring infections.
