NEW QUESTION: 3

HOTSPOT

You need to recommend strategies for storing data.

Which services should you recommend? To answer, select the appropriate storage technology for each data type in the answer area.

Answer:

Explanation:

* Media metadata: Azure Queue Storage Service

Scenario: Media metadata must be stored in Azure Table storage. Azure Queues provide a uniform and consistent programming model across queues, tables, and BLOBs - both for developers and for operations teams.

* Images: Azure Mobile Services

Scenario: Media files must be stored in Azure BLOB storage.

You can use Azure Mobile Services to access images from mobile devices.

* Audio: Azure Media Services

* Video: Azure Media Services

Microsoft Azure Media Services is an extensible cloud-based platform that enables developers to build scalable media management and delivery applications. Media Services is based on REST APIs that enable you to securely upload, store, encode and package video or audio content for both on-demand and live streaming delivery to various clients (for example, TV, PC, and mobile devices).
