NEW QUESTION: 1

A network engineer is asked to configure a "site-to-site" IPsec VPN tunnel. One of the last things that the engineer does is to configure an access list (access-list 1 permit any) along with the command ip nat inside source list 1 int s0/0 overload. Which functions do the two commands serve in this scenario?

A. The command ip nat inside source list 1 int s0/0 overload provides "many-to-one" access for all devices on a defined

segment to share a single IP address upon exiting the external interface.

B. The command `access-list 1` defines interesting traffic that is allowed through the tunnel

C. The command `access-list 1 permit any` defines only one machine that is allowed through the tunnel.

D. The command `ip nat inside source list 1 int s0/0 overload` disables "many-to-one" access for all devices on a defined segment to share a single IP address upon exiting the external interface.

Answer: A

NEW QUESTION: 2

When using an implicit intent, what process does the system use to know what to do with it?

A. Intent transition

B. Intent declaration

C. Intent resolution

D. Intent overloading

Answer: C

NEW QUESTION: 3

The Security team needs to provide a team of interns with an AWS environment so they can build the serverless video transcoding application. The project will use Amazon S3, AWS Lambda, Amazon API Gateway, Amazon Cognito, Amazon DynamoDB, and Amazon Elastic Transcoder.

The interns should be able to create and configure the necessary resources, but they may not have access to create or modify AWS IAM roles. The Solutions Architect creates a policy and attaches it to the interns' group.

How should the Security team configure the environment to ensure that the interns are self-sufficient?

A. Create a policy that allows creation of all project-related resources, including roles that allow access only to specified resources.

B. Create roles with the required service permissions, which are assumable by the services. Have the interns create and use a bastion host to create the project resources in the project subnet only.

C. Create a policy that allows creation of project-related resources only. Create roles with required service permissions, which are assumable by the services.

D. Create a policy that allows creation of project-related resources only. Require the interns to raise a request for roles to be created with the Security team. The interns will provide the requirements for the permissions to be set in the role.

Answer: A
