Answer: B

Explanation:

Refer AWS documentation - SAM Gradual Code Deployment

If you use AWS SAM to create your serverless application, it comes built-in with AWS CodeDeploy to help ensure safe Lambda deployments. With just a few lines of configuration, AWS SAM does the following for you:

- * Deploys new versions of your Lambda function, and automatically creates aliases that point to the new version.
- * Gradually shifts customer traffic to the new version until you're satisfied that it's working as expected, or you roll back the update.
- * Defines pre-traffic and post-traffic test functions to verify that the newly deployed code is configured correctly and your application operates as expected.
- * Rolls back the deployment if CloudWatch alarms are triggered.

NEW QUESTION: 3

You have the following key-value pairs as output from your Map task:

- A. Five
- B. Two
- C. Three
- D. Six
- E. One
- F. Four

Answer: A
