- A. Company structure log file
- B. Consolidation structures log file
- C. Verify Structures menu
- D. Verify Companies menu

Answer: C

NEW QUESTION: 3

Which of the following are case user roles in Cam? Which of the following are case user roles in C?am?

- A. Case nominee
- B. Case owner
- C. Case supervisor
- D. Case reviewer

Answer: B,C,D

NEW QUESTION: 4

Your network contains an Active Directory domain named contoso.com. All domain controllers run Windows Server 2012 R2. Administrators use client computers that run Windows 8 to perform all management tasks.

A central store is configured on a domain controller named DC1. You have a custom administrative template file named App1.admx.

Appl.admx contains application settings for an application named Appl.

From a client computer named Computer1, you create a new Group Policy object (GPO) named GPO1.

You discover that the application settings for Appl fail to appear in GPO1.

You need to ensure that the Appl settings appear in all of the new GPOs that you create.

What should you do?

A. From the Default Domain Controllers Policy, add Appl.admx to the Administrative Templates.

B. Copy Appl.admx to
\\Contoso.com\SYSVOL\Contoso.com\StarterGPOs.

C. Copy Appl.admx to
\\Contoso.com\SYSVOL\Contoso.com\Policies\PolicyDefinitions\.

D. From the Default Domain Policy, add Appl.admx to the Administrative Templates.

Answer: C

Explanation:

To take advantage of the benefits of .admx files, you must create a Central Store in the SYSVOL folder on a domain controller. The Central Store is a file location that is checked by the Group Policy tools. The Group Policy tools use any .admx files that are in the Central Store. The files that are in the Central Store are later replicated to all domain controllers in the domain.
