#### **NEW QUESTION: 1**

Assume 18 bytes for the Layer 2 header and a 10- millisecond voice payload, how much bandwidth should be allocated to strict priority queue for three VoIP calls that use a G 722 codec over

an Ethernet network?

- A. 238.4 kb/s
- B. 347.8 kb/s
- C. 261.6 kb/s
- D. 331.2 kb/s
- E. 274.7 kb/s

**Answer: D**

**NEW QUESTION: 2**

Which two statements about Cisco Nexus 1000V Series Switches are correct? (Choose two.)

- A. The service console is a critical interface that resides on every logical server.
- B. When VSM interfaces are created for a virtual machine, the VMware vSwitch port-group configuration is used initially, which requires the creation of a port-group name for these interfaces and an appropriate VLAN. The simplest configuration is to create a single port group (for example, VSM-Interfaces), that includes all the interfaces that use this port group and the same VLAN.
- C. The mgmt0 interface on the VSM does not necessarily require its own VLAN. In fact, you can use the same VLAN to which the VMware vCenter Server belongs. The VSM management VLAN is really no different from any other virtual machine data VLAN. Alternatively, network administrators can designate a special VLAN for network device management.
- D. Always deploy the Cisco Nexus 1000V Series VSM in pairs, with one VSM that is defined as the primary module and the other that is defined as the secondary module on two separate hosts.

**Answer: C,D**

**NEW QUESTION: 3**

You have a List control that is populated with product XML data. The product data includes the name and price of the product. You want the name and the price values to appear concatenated in the label field of the List. You do NOT want to affect the underlying data. The name and price values are separate nodes in the XML.

Which two approaches could be used to achieve the desired result (Choose two)?

- A. Create a custom ItemRenderer to display the data
- B. Use the labelFunction property of the List control
- C. Bind the dataProvider property of the List to an E4X statement with the XML
- D. Create a custom style for the List control to display the data
- E. Specify "{name} {price}" in the labelField property of the List control

**Answer: A,B**
