NEW QUESTION: 2

Your customer asks you about the Performance Pack. You explain to him that a Performance Pack is a software acceleration product which improves the performance of the Security Gateway. There are two ways to enable or disable this acceleration. The first one is to use the command `cpconfig` (see the Figure 1). The second one is to use the command `fwaccel on off` (see the Figure 2).

What is the difference between those two commands?

- A. The command `cpconfig` works on the Security Platform only. The command `fwaccel` can be used on all platforms.
- B. Both commands have the same function.
- C. The `cpconfig` command enables acceleration. The command `fwaccel` can dynamically change the setting, but after the reboot it reverts to the default setting.
- D. The `fwaccel` command determines the default setting. The command `cpconfig` can dynamically change the setting, but after the reboot it reverts to the default setting.
