You have a database that contains both disk-based and
memory-optimized tables.
You need to create two modules. The modules must meet the
requirements described in the following table.

Which programming object should you use for each module? To
answer, select the appropriate object types in the answer area.

Answer:
Explanation:

Explanation

Module 1: Interpreted stored procedure
An interpreted stored procedure can access both disk-based and
memory-optimized tables.
Module 2: Natively compiled stored procedure
Natively compiled stored procedures are Transact-SQL stored
procedures compiled to native code that access memory-optimized
tables. Natively compiled stored procedures allow for efficient
execution of the queries and business logic in the stored
procedure.
