NEW QUESTION: 1

Which two types of workloads are efficiently consolidated when virtualized? (Choose two.)

- A. Workloads that are NOT CPU bound; most of their time is spent waiting for external events such as user interaction.
- B. Workloads that do NOT require user input and are constantly processing large amounts of batched data.
- C. Workloads that do NOT require access to specific physical resources such as a hardware dongle or graphics card.
- D. Workloads that will consume all available assigned resources.

Answer: A,C

Explanation:

Explanation

Workloads that are constantly using resources would prevent other VMs from accessing them, causing performance issues.

Instead, if they use little and spend time waiting then resources are available for other VMs. Access to physical resources would prevent major virtualization benefits like HA etc.

NEW QUESTION: 2

According to the matching principle

- A.** a firm's operating performance is measured properly when revenues and expenses related to one another in a given time period are taken into account.
- B.** a firm should match the value of its assets and liabilities on the balance sheet.
- C.** a firm should match its depreciation accounting for tax and reporting purposes.

Answer: A

Explanation:

The matching principle states that a firm must match its expenses to revenues earned in a given period. If an expense is incurred but there is no related revenue, the expense must be deferred to a later period when revenue is recognized.

NEW QUESTION: 3

Refer to the exhibit.

A company has a Mobility Master (MM)-based solution with a guest WLAN. During the captive portal redirection, users who access a non-HTTPS Website see the error shown in the exhibit. How can a network administrator prevent this error?

- A.** Reconfigure the guest WLAN to use EAP methods that rely on passwords rather than certificates.
- B.** Enable automatic CPsec certificate deployment.
- C.** Replace the default server certificate for mobility controllers with a certificate signed by a trusted CA.
- D.** Replace the default Mobility Master certificate with a certificate that has the correct hostname.

Answer: C
