If you want to pass Data-Architecture-And-Management-Designer almost 100%, you need high-quality and useful Data-Architecture-And-Management-Designer exam dumps, When it comes to our Salesforce Application Architect Data-Architecture-And-Management-Designer exam dumps, we are confident that the quality and validity are incomparable, which can help you pass the Data-Architecture-And-Management-Designer exam test with ease.

As long as you provide us with proof that you failed the exam after using our Data-Architecture-And-Management-Designer, we can refund immediately, Preparing for the exam may be not an easy thing for some candidates, [Reliable E-S4CPE-2021 Exam Pdf](#) if you choose us, we will do the things for you, what you need to do is practicing.

If you use the APP online version, just download the application program, you can enjoy our Data-Architecture-And-Management-Designer test material service, We have always set great store by superior after sale service, since we all tend to take responsibility for our customers who decide to choose our Data-Architecture-And-Management-Designer training materials.

2022 High Hit-Rate Data-Architecture-And-Management-Designer Reliable Dumps Pdf | 100% Free Salesforce Certified Data Architecture and Management Designer Latest Test Practice But if you choose our Salesforce Certified Data Architecture and Management Designer practice materials, you will never be rueful but harvest success, Every time they try our new version of the Data-Architecture-And-Management-Designer New Braindumps Free real exam, they will write down their feelings and guidance.

Obtaining an international Data-Architecture-And-Management-Designer certification should be your basic configuration, Wish you may and wish you might, Now, quickly download Data-Architecture-And-Management-Designer free demo for try.

Our company is a professional certificate exam materials **Data-Architecture-And-Management-Designer Reliable Dumps Pdf** provider, we have occupied in the field for years, and we also famous for providing high-quality exam dumps.

After the payment for our Data-Architecture-And-Management-Designer exam materials is successful, you will receive an email from our system within 5-10 minutes; then, click on the link to log on and you can use Data-Architecture-And-Management-Designer preparation materials to study immediately.

If you are determined to improve yourselves from now on, our Test king Data-Architecture-And-Management-Designer will be the

best choice for you, By compiling our Salesforce Certified Data Architecture and Management Designer prepare torrents with **Data-Architecture-And-Management-Designer Reliable Dumps Pdf** meticulous attitude, the accuracy and proficiency of them is nearly perfect.

The clients can have a free download and tryout of our Data-Architecture-And-Management-Designer test practice dump before they decide to buy our products, These Data-Architecture-And-Management-Designer braindumps PDF files can be used on mobile, tablets, and laptops as well.

NEW QUESTION: 1

Exhibit

In the exhibits, VLAN 20 under a device name indicates that device is configured with that VLAN.

The exhibits also indicate whether VLAN 20 is statically configured on each link, either as an untagged or a tagged VLAN. If the link has no label, VLAN 20 is not statically configured on that link.

A network administrator needs to deploy AOS-Switches that use port-based tunneled node.

The plan calls for tunneled-node endpoints to be assigned to VLAN 20 and for the Aruba Mobility Controller to handle the tunneled-node traffic at Layer 2. Which exhibit shows the correct plan for VLAN 20 in the wired infrastructure?

- A. A
- B. D
- C. C
- D. B

Answer: C

NEW QUESTION: 2

Drag and Drop Question

Drag the example on the left to the appropriate type of developing business trend on the right.

Answer:

Explanation:

NEW QUESTION: 3

You manage a SharePoint farm in an Active Directory Domain Services (AD DS) forest. You implement SharePoint Online. AD DS users must be able to access on-premises sites and SharePoint Online resources without having to authenticate each time that they access SharePoint Online. You replace the

default certificate for validating incoming tokens in the SharePointfarm.

You need to ensure that SharePoint uses the new certificate. Which service must you restart?

- A. Certificate Service
- B. SharePoint Timer Service
- C. Component Services
- D. Security Token Service

Answer: B

Explanation:

When you replace the Security Token Service (STS) certificate for a SharePoint 2013 farm you need to restart IIS and the SharePoint timer service.

Reference: Replace the STS certificate for the on-premises environment

<https://technet.microsoft.com/en-us/library/dn551378.aspx>

NEW QUESTION: 4

You need to upload video to the company's Azure environment. What should you do?

- A. Write directly to the storage REST APIs.
- B. Create a site-to-site VPN connection.
- C. Create an ExpressRoute connection.
- D. Use the Azure Import/Export service to move the data.

Answer: C

Explanation:

/ Media files must be stored in Azure BLOB storage.
/ Media uploads must have fast data transfer rates (low latency) without the need to upload the data offline.

=====

Topic 5, Northwind traders

Background

Overview

Northwind Electric Cars is the premier provider of private, low-cost transportation in Denver. Northwind drivers are company employees who work together as a team. The founding partners believe that by hiring their drivers as employees, their drivers focus on providing a great customer experience. Northwind Electric Cars has a reputation for offering fast, reliable, and friendly service, due largely to their extensive network of drivers and their proprietary dispatching software named NorthRide.

Northwind Electric Cars drivers depend on frequent, automatic updates for the NorthRide mobile app. The Northwind management team is concerned about unplanned system downtime and slow connection speeds caused by high usage. Additionally, Northwind's in-house data storage solution is unsustainable because of the new influx of customer data that is retained. Data backups are made periodically on DVDs and stored on-premises at corporate headquarters.

Apps

NorthRide App

Northwind drivers use the NorthRide app to meet customer pickup requests. The app uses a GPS transponder in each Northwind vehicle and Bing Maps APIs to monitor the location of each vehicle in the fleet in real time. NorthRide allows Northwind dispatchers to optimize their driver coverage throughout the city.

When new customers call, the dispatcher enters their pickup locations into NorthRide.

NorthRide identifies the closest available driver. The dispatcher then contacts the driver with the pick-up details. This process usually results in a pick-up time that is far faster than the industry average.

Drivers use NorthRide to track the number of miles they drive and the number of customers they transport. Drivers also track their progress towards their established goals, which are measured by using key performance indicators (KPIs).

NorthRide App 2.0

Northwind Electric Cars is growing quickly. New callers often wait for their calls to be answered because the dispatchers are contacting their drivers to arrange pickups for other customers.

To support the growth of the business, Northwind's development team completes an overhaul of the NorthRide system that it has named NorthRide 2.0. When a dispatcher enters a customer's pickup location, the address and driving directions are automatically sent to the driver who is closest to the customer's pickup location.

Drivers indicate their availability on the NorthRide mobile app and can view progress towards their KPI's in real time. Drivers can also record customer ratings and feedback for each pickup.

Business Requirements

Apps

NorthRideFinder App

Northwind Electric Cars needs a customer-facing website and mobile app that allows customers to schedule pickups. Customers should also be able to create profiles that will help ensure the customer gets a ride faster by storing customer information.

Predictor App

Northwind Electric Cars needs a new solution named Predictor. Predictor is an employee-facing mobile app. The app predicts periods of high usage and popular pickup locations and provides various ways to view this predictive data. Northwind uses this information to better distribute its drivers. Northwind wants to use the latest Azure technology to create this solution.

Other Requirements

- * On-premises data must be constantly backed up.
- * Mobile data must be protected from loss, even if connectivity with the backend is lost.
- * Dispatch offices need to have seamless access to both their primary data center and the applications and services that are hosted in the Azure cloud.

* Connectivity needs to be redundant to on-premises and cloud services, while providing a way for each dispatch office to continue to operate even if one or all of the connection options fail.

* The management team requires that operational data is accessible 24/7 from any office location.

Technical Requirements

Apps and Website

NorthRide / NorthRideFinder Apps:

* The solution must support on-premises and Azure data storage.

* The solution must scale as necessary based on the current number of concurrent users.

* Customer pickup requests from NorthRideFinder must be asynchronous.

* The customer pickup request system will be high in volume, and each request will have a short life span.

* Data for NorthRideFinder must be protected during a loss of connectivity.

* NorthRide users must authenticate to the company's Azure Active Directory.

Northwind Public Website

* The customer website must use a WebJob to process profile images into thumbnails

* The customer website must be developed with lowest cost and difficulty in mind.

* The customer website must automatically scale to minimize response times for customers.

Other Requirements

Data Storage:

* The data storage must interface with an on-premises Microsoft SQL backend database.

* A disaster recovery system needs to be in place for large amounts of data that will backup to Azure.

* Backups must be fully automated and managed the Azure Management Portal.

* The recovery system for company data must use a hybrid solution to back up both the on-premises Microsoft SQL backend and any Azure storage.

Predictive Routing:

* An Azure solution must be used for prediction systems.

* Predictive analytics must be published as a web service and accessible by using the REST API.

Security:

* The NorthRide app must use an additional level of authentication other than the employee's password.

* Access must be secured in NorthRide without opening a firewall port.

* Company policy prohibits inbound connections from internet callers to the on- premises network.

* Customer usernames in NorthRideFinder cannot exceed 10 characters.

* Customer data in NorthRideFinder can be received only by the user ID that is associated with the data.
