Perhaps our EAEP2201B exam materials can become your top choice.

**NEW QUESTION: 1**

If  $x = 5$  and  $y = 2x + 2$ , what is the value of  $y$  ?

A) B)

C) D)

E)

A. Option C

B. Option B

C. Option A

D. Option D

**Answer: D**

**NEW QUESTION: 2**

The ASM instance in your environment can support databases from version 10.2.0.4 through

11.2.0.1 You want to use all ASM functionality possible for each database, including OCR and voting files in the ASM. What is the proper setting for the ASM diskgroup attribute on diskgroups being used by all the instances?

A. Set compatible.asm to 10.2 and compatible.rdbms to 11.2

B. Set compatible.asm to 11.2 and compatible.rdbms to 10.2

C. Set compatible.asm to 11.2 and compatible.rdbms to 11.2

D. Set compatible.asm to 10.2 and compatible.rdbms to 10.2

**Answer: B**

Explanation:

Disk Group Compatibility Attributes

COMPATIBLE.ASM

The value for the disk group COMPATIBLE.ASM attribute determines the minimum software version for an Oracle ASM instance that can use the disk group.

This setting also affects the format of the data structures for the Oracle ASM metadata on the disk. The format of other file

contents is determined by Oracle ASM Dynamic Volume Manager (Oracle ADVM) and the database instance.

For Oracle ASM in Oracle Database 11g, 10.1 is the default setting for the COMPATIBLE.ASM

attribute when using the SQL CREATE DISKGROUP statement, the ASMCMD mkdgm command,

and Oracle Enterprise Manager Create Disk Group page. When creating a disk group with

ASMCA, the default setting is 11.2.

COMPATIBLE.RDBMS

The value for the disk group COMPATIBLE.RDBMS attribute determines the minimum

COMPATIBLE database initialization parameter setting for any database instance that is allowed

to use the disk group. Before advancing the COMPATIBLE.RDBMS attribute, ensure that the

values for the COMPATIBLE initialization parameter for all of the databases that access the disk

group are set to at least the value of the new setting for COMPATIBLE.RDBMS.

For example, if the COMPATIBLE initialization parameters of the databases are set to either 11.1

or 11.2, then COMPATIBLE.RDBMS can be set to any value between 10.1 and 11.1 inclusively.
