What is the most effective way for you to achieve [IIA-CIA-Part2-3P Valid Test Book](#) your lofty aspirations which are related to this industry, An old saying that learning by doing is highly extorted by most **E_S4CPE_2021 Associate Level Exam** people nowadays, which is gradually deep-rooted in the minds of the general public.

Guarantee advantage, Many benefits for the PDF version, To [E_S4CPE_2021](#) get an ultimate and fantastic success in the latest SAP Certified Application Specialist - SAP S/4HANA Cloud, private edition implementation with SAP Activate you can have complete guidance and support from the latest E_S4CPE_2021 SAP interactive testing engine and Braindump E_S4CPE_2021 latest online training and both these tools are highly suitable for the exam preparation.

Our education experts have good relationship with the E_S4CPE_2021 staff, If you prefer practicing on the simulated real test, our second version, the E_S4CPE_2021 VCE PC dumps may be your first choice and it has no limits on numbers of PC but based on Windows only.

NEW QUESTION: 1

CORRECT TEXT

A corporation wants to add security to its network. The requirements are: Host B should be able to use a web browser (HTTP) to access the Finance Web

-

Server.

--

-

Other types of access from host B to the Finance Web Server should be blocked.

All access from hosts in the Core or local LAN to the Finance Web Server should be blocked.

All hosts in the Core and on local LAN should be able to access the Public Web Server.

You have been tasked to create and apply a numbered access list to a single outbound interface. This access list can contain no more than three statements that meet these requirements. Access to the router CLI can be gained by clicking on the appropriate host.

All passwords have been temporarily set to "cisco".
The Core connection uses an IP address of 198.18.132.65.
The computers in the Hosts LAN have been assigned addresses of
192.168.201.1
- 192.168.201.254.

host A 192.168.201.1 host B 192.168.201.2 host C 192.168.201.3
host D 192.168.201.4
The Finance Web Server has been assigned an address of
172.22.237.17.
The Public Web Server in the Server LAN has been assigned an
address of
172.22.237.18.

Answer:

Explanation:

Please check the below explanation for all details.
We should create an access-list and apply it to the interface that is connected to the Server LAN because it can filter out traffic from both S2 and Core networks. To see which interface this is, use the "show ip interface brief" command:

Macintosh HD:Users:danielkeller:Desktop:Screen Shot 2015-11-17 at 3.24.34 PM.png

From this, we know that the servers are located on the fa0/1 interface, so we will place our numbered access list here in the outbound direction.

Corp1#configure terminal

Our access-list needs to allow host B - 192.168.125.2 to the Finance Web Server

172.22.109.17 via HTTP (port 80), so our first line is this:
Corp1(config)#access-list 100 permit tcp host 192.168.125.2 host 172.22.109.17 eq 80

Then, our next two instructions are these:

- Other types of access from host B to the Finance Web Server should be blocked. - All access from hosts in the Core or local LAN to the Finance Web Server should be blocked. This can be accomplished with one command (which we need to do as our ACL needs to be no more than 3 lines long), blocking all other access to the finance web server:

Corp1(config)#access-list 100 deny ip any host 172.22.109.17

Our last instruction is to allow all hosts in the Core and on the local LAN access to the Public Web Server (172.22.109.18)

Corp1(config)#access-list 100 permit ip host 172.22.109.18 any
Finally, apply this access-list to Fa0/1 interface (outbound

direction)

```
Corp1(config)#interface fa0/1 Corp1(config-if)#ip access-group 100 out
```

Notice: We have to apply the access-list to Fa0/1 interface (not Fa0/0 interface) so that the access-list can filter traffic coming from both the LAN and the Core networks. To verify, just click on host B to open its web browser. In the address box type `http://172.22.109.17` to check if you are allowed to access Finance Web Server or not. If your configuration is correct then you can access it. Click on other hosts (A, C and D) and check to make sure you can't access Finance Web Server from these hosts. Then, repeat to make sure they can reach the public server at 172.22.109.18. Finally, save the configuration

```
Corp1(config-if)#end Corp1#copy running-config startup-config
```

NEW QUESTION: 2

A customer is implementing a new application that requires a high level of security. The application will be used to manage sensitive data. Which of the following is the most appropriate security measure to implement?

- A. Data Guard as a Service
- B. Oracle Data Guard
- C. Oracle Data Vault
- D. Oracle Data Masking and Redaction

Answer: A,D

NEW QUESTION: 3

A customer has determined that aesthetics is a primary concern for their upcoming guest deployment. Which design consideration can be leveraged to address this concern?

- A. Deploy environmentally friendly cabling components to blend into the environment.
- B. Use AIR-AP-BRACKET-1 to allow for greater mounting locations
- C. Use enclosures to hide the wireless infrastructure in the surrounding environment
- D. Paint the access point to cover the LED from being noticeable

Answer: A

NEW QUESTION: 4

Which configuration command places interfaces whose IP

addresses are between 192.168.0.0 and 192.168.255.255 into OSPF area 0?

- A. network 192.168.0.0 255.255.0.0 area 0.0.0.0
- B. area 0.0.0.0 network 192.168.0.0 0.0.255.255
- C. area 0.0.0.0 network 192.168.0.0 255.255.0.0
- D. network 192.168.0.0 0.0.255.255 area 0.0.0.0

Answer: D
