**Answer: C**

Explanation:

[http://www.cisco.com/en/US/docs/ios/12\\_2/debug/command/reference/dbfaaa.html](http://www.cisco.com/en/US/docs/ios/12_2/debug/command/reference/dbfaaa.html)

debug aaa authentication To display information on AAA/Terminal Access Controller Access Control System Plus (TACACS+)

authentication, use the debug aaa authentication privileged EXEC command. To disable debugging command, use the no form of the command. debug aaa authentication no debug aaa

authentication The following is sample output from the debug aaa authentication command. A single EXEC login that uses the "default" method list and the first method, TACACS+, is displayed. The TACACS+ server sends a GETUSER request to prompt for the username and then a GETPASS request to prompt for the password, and finally a PASS response to indicate a successful login. The number 50996740 is the session ID, which is unique

for each authentication. Use this ID number to distinguish between different authentications if several are occurring concurrently.
