Now buy the two versions of our material, you will get a 50% discount, So [EAPA2101 Valid Dumps Ppt](#) with the comfortable status and confidence, and by using the high-pass rate MuleSoft Certified Integration Architect - Level 1 training guide, you can pass your exam at first attempt.

PDF version of our MCIA-Level-1 study materials- it is legible to read and remember, and support customers'™ printing request.

**NEW QUESTION: 1**

You are the project manager of the NHL Project for your organization. You are working with your project team to create the schedule baseline for this project. According to you, which of the following statements describes how the schedule baseline is created?

- A. It is created by the stakeholders.
- B. It is derived from the constraints of the project.
- C. It is developed from the schedule network analysis.
- D. It is assigned to the project by management.

**Answer: C**

Explanation:

The schedule baseline is a specific version of the project schedule developed from the schedule network analysis. It is built by networking individual work elements and verifying the path or paths with the longest total duration. That path is then compared against the project due date, or it may serve as the determinant of the project end date. Schedule baseline is a project schedule used in measuring project progress. It helps provide a comparison with the actual progress of work against

Which command allows hosts that are connected to FastEthernet0/2 to access the Internet?

- A. ip nat outside source list 10 interface FastEthernet0/2 overload
- B. ip nat inside source list 10 interface FastEthernet0/1 overload
- C. ip nat outside source static 209.165.200.225 10.10.10.0 overload
- D. ip nat inside source list 10 interface FastEthernet0/2 overload

**Answer: B**

#### **NEW QUESTION: 4**

You are deploying a new application that uses Azure virtual machines.

You plan to use the Desired State Configuration (DSC) extension on the virtual machines.

You need to ensure that the virtual machines always have the same Windows features installed.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation

Step 1: Create a PowerShell configuration file

You create a simple PowerShell DSC configuration file.

Step 2: Load the file to Azure Blob storage

Package and publish the module to a publically accessible blob container URL Step 3: Configure the Custom Script Extension on the virtual machines.

The Custom Script Extension downloads and executes scripts on Azure virtual machines.
