#### **NEW QUESTION: 2**

Refer to the exhibit.

Which one statement is true?

- A. Traffic from the 172.16.0.0/16 network will be blocked by

the ACL.

- B.** The 10.0.0.0/8 network will not be in the routing table on Router B.
- C.** The 10.0.0.0/8 network will not be advertised by Router B because the network statement for the 10.0.0.0/8 network is missing from Router
- D.** Router B will not advertise the 10.0.0.0/8 network because it is blocked by the ACL.
- E.** Users on the 10.0.0.0/8 network can successfully ping users on the 192.168.5.0/24 network, but users on the 192.168.5.0/24 cannot successfully ping users on the 10.0.0.0/8 network.

**Answer: D**

### **NEW QUESTION: 3**

Refer to the exhibit.

The device with this configuration is unable to reach network 172.31.31.0/24. The next hop router has been verified to have full connectivity to the network. Which two actions can you take to establish connectivity to the network? (Choose two.)

- A.** Modify the existing static route so that the next hop is 0.0.0.0.
- B.** Create a static route to the loopback address of the next hop router.
- C.** Create a static route to 172.16.199.0 using the address of the next hop router.
- D.** Replace the ip default-network command with the ip default-gateway command.
- E.** Create a default route to the link address of the next hop router.
- F.** Create a default route to 172.16.199.9.

**Answer: C,E**

Explanation:

Unlike the ip default-gateway command, you can use ip default-network when ip routing is enabled on the Cisco router. When you configure ip default-network the router considers routes to that network for installation as the gateway of last resort on the router.

For every network configured with ip default-network, if a router has a route to that network, that route is flagged as a candidate default route. However, in this case if the router does not a route to the drfault network of 172.16.199.9, then you would need to ensure that this route exists by creating a static route to 172.16.199.0 using the address of the next hop router, or simply create a default route using the address of the next hop router.

### **NEW QUESTION: 4**

In which content types can you include product recommendations?

- A. LINE message
- B. Landing page
- C. Email
- D. Push notification

**Answer: C**
