You can purchase according to your own tastes.

NEW QUESTION: 1

You need a fast, fully-managed, petabyte-scale data warehouse that makes it simple and cost-effective to analyze all your data using your existing business intelligence tools. Which Big Data tool should you use?

Choose the correct answer:

- A. Data Pipeline
- B. Redshift
- C. EMR
- D. Kinesis

Answer: B

Explanation:

Amazon Redshift is ideal for large volumes of structured data that you want to persist and query using standard SQL and your existing BI tools. Amazon EMR is ideal for processing and transforming unstructured or semi-structured data to bring in to Amazon Redshift and is also a much better option for data sets that are relatively transitory, not stored for long-term use.
