There are 24/7 customer assisting to support you in case you QSBA2021 Latest Dump may encounter some problems like downloading, You can make more good friends and you can really live your fantasy life.

### **NEW QUESTION: 1**

Nachdem Sie eine Frage in diesem Abschnitt beantwortet haben, können Sie NICHT mehr darauf zurückgreifen. Daher werden diese Fragen nicht im Überprüfungs bildschirm angezeigt. Sie unterstützen eine Anwendung, die Daten in einer Microsoft SQL Server-Datenbank speichert. Sie haben eine Abfrage, die Daten für einen Bericht zurückgibt, den Benutzer häufig ausführen.

Das Abfrageoptimierungsprogramm generiert manchmal einen Plan mit schlechter Leistung für die Abfrage, wenn bestimmte Parameter verwendet werden. Sie stellen fest, dass dies auf die Verteilung von Daten innerhalb einer bestimmten Tabelle zurückzuführen ist, die von der Abfrage verwendet wird. Sie müssen sicherstellen, dass das Abfrageoptimierungsprogramm immer den von Ihnen bevorzugten Abfrageplan verwendet.

Lösung: Sie erstellen einen Planleitfaden für die Abfrage, indem Sie den gewünschten Abfrageplan und die gespeicherte Prozedur `sp_create_plan_guide` verwenden.

Erfüllt die Lösung das Ziel?

- A. Ja
- B. Nein

**Answer: B**

Explanation:

Explanation

The KEEPFIXED PLAN should be used as it forces the query optimizer not to recompile a query due to changes in statistics.

### **NEW QUESTION: 2**

On the ProxySG, where can you specify whether a client is permitted to allow an untrusted server certificate? (Select all that apply)

- A. In the VPM.
- B. In the Management Console.

C. In CPL.

**Answer: B**

**NEW QUESTION: 3**

Which of the following items is the MOST important consideration when selecting an audit team member?

- A. Being competent in auditing techniques.
- B. Having technical knowledge of the area being audited.
- C. Being familiar with the organization that will be audited.
- D. Being competent in many quality control techniques.

**Answer: A**

**NEW QUESTION: 4**

Your company has a datacenter in Los Angeles.

The datacenter contains a private cloud that is managed by using a System Center 2012 infrastructure.

A server named VMM1 hosts the System Center 2012 Service Manager management server.

A server named Server2 hosts the System Center 2012 Orchestrator management server.

You plan to use a runbook named Book1 to update the status of Service Manager incidents.

You need to ensure that you can create Book1, and then reference the runbook in Service Manager.

What should you do? (Each correct answer presents part of the solution.

Choose all that apply.)

- A. From the Service Manager Console, create an Orchestrator connector.
- B. From the Service Manager Shell, run the Enable-SCDWJobSchedule cmdlet.
- C. From the Orchestrator Deployment Manager, register the Integration Pack for System Center Service Manager.
- D. From the Service Manager Shell, run the Set-SCDWJobSchedule cmdlet.
- E. From the System Center 2012 Orchestrator Runbook designer, create a connection.
- F. From the Service Manager Console, add an incident event workflow.

**Answer: A,C,E**

Explanation:

Just a draft:

-Install the integration pack for SCSM on Orchstrator and configure the connection settings (SCSM server name, User, Password)

-Create a new runbook

-First activity -&gt; "Monitor Object" of SCSM integration pack  
-&gt; Incident Class -&gt; On Update -&gt; Filter "Support Group" not equal "Tier 1"

- Add 6 "Send Email" activities -&gt; 6 different recipients
- &gt; add the text in each mail body
- Link all 6 "Send Email" activities with the first "Monitor Object" activity
- On each link delete the default rule "On success"
- Add a new criteria -&gt; Choose the "Support Group" from the data bus -&gt; criteria of the first link "Support Group" equals "Tier 2"

- Do the same with the other Links and Support Groups.

- Check in and start the runbook

<http://social.technet.microsoft.com/Forums/en/administration/thread/ea41a3a4-0b40-47ee-9ecca2ecab8794bf>

To create an Orchestrator connector

In the Service Manager console, click Administration.

In the Administration pane, expand Administration, and then click Connectors.

In the Tasks pane, under Connectors, click Create Connector, and then click Orchestrator connector.

Perform these steps to complete the Orchestrator Connector Wizard:

On the Before You Begin page, click Next.

On the General page, in the Name box, type a name for the new connector. Make sure that Enable this connector is selected, and then click Next.

On the Connection page, in the Server Information area, type the URL of the Orchestrator Web service, depending on which version of Orchestrator you are using:

For Orchestrator Beta, type the URL of the Orchestrator Web service in the form of `http://`

`&lt;computer&gt;:&lt;port&gt;/Orchestrator.svc`, where

`&lt;computer&gt;` is the name of the computer hosting the web service and `&lt;port&gt;` is the port number where the web service is installed. (The default port number is 81.)

For Orchestrator RC, type the URL of the Orchestrator Web

service in the form of `http://&lt;computer&gt;:&lt;port&gt;/Orchestrator2012/Orchestrator.svc`, where `&lt;computer&gt;` is

the name of the computer hosting the web

service and `&lt;port&gt;` is the port number where the web service is installed. (The default port number is 81.)

On the Connection page, in the Credentials area, either select an existing account or click New, and then

do the following:

In the Run As Account dialog box, in the Display name box, type a name for the Run As account. In the

Account list, select Windows Account. Enter the credentials for an account that has rights to connect

Orchestrator, and then click OK. On the Connection page, click Test Connection.

Note

Special characters (such as the ampersand [`&`]) in the User Name box are not supported.

In the Test Connection dialog box, make sure that the message "The connection to the server was

successful" appears, and then click OK. On the Connection page, click Next.

On the Folder page, select a folder, and then click Next.

On the Web Console URL page, type the URL for the Orchestrator web console in the form of `http://<computer>:port` (the default port number is 82), and then click Next.

On the Summary page, make sure that the settings are correct, and then click Create.

On the Completion page, make sure that you receive the message "Orchestrator connector successfully created," and then click Close.

To validate the creation of an Orchestrator connector

In the Connectors pane, locate the Orchestrator connector that you created.

Review the Status column for a status of Finished Success.

Note

Allow sufficient time for the import process to finish if you are importing a large number of runbooks.

In the Service Manager console, click Library.

In the Library pane, expand Library, and then click Runbooks.

Review the Runbooks pane, and note that your runbooks have been imported.
