- A. YouTube
- B. LinkedIn
- C. Amazon
- D. Facebook

Answer: B,D

NEW QUESTION: 3

What, if any, compatibility problems might arise if an 802.11b client station wireless network interface card (NIC) configured for use in Europe is used with an 802.11b access point configured for use in the United States?

- A. No compatibility problems would occur because the physical layer of the 802.11b standard is the same world-wide.
- B. The NIC would not see the access point at all because European 802.11b radios use HyperChannel encoding at the physical layer.
- C. S. use different channel sets.
- D. No compatibility problems would arise because the wireless NIC is capable of operating on any channel specified by the 802.11b access point.
- E. The station NIC might not be able to talk to the access point because Europe and the

Answer: D

NEW QUESTION: 4

Your customer has purchased their brand new Exadata Database Machine X3-2 Full rack to achieve 20-TB-per-hour backups on their 300 TB database.

You have been called to determine why they are not able to achieve even half that rate. Use the information in the image below to identify two reasons their backups are still slow.

- A. The number of database servers is causing a bottleneck.
- B. LVM snapshots are not configured properly on the Database Server.
- C. Exadata backups are being performed using RMAN over the 10 Gigabit Ethernet network.
- D. The number of tape drives is causing a bottleneck.
- E. The Media Server to Tape Library transfer is causing a bottleneck.

Answer: D,E

Explanation:

The following bottlenecks will be reached first if using

InfiniBand fabric to media server:

- 1 . Media server to tape library SAN transfer rate
- 2 . Number of tape drives
